
What is ASIIS?

ASIIS is the Arizona State Immunization Information System. It is a key component to immunization service delivery. ASIIS provides a comprehensive way to manage all your immunization data. It's a tool to simplify the statewide reporting and management of immunization data. When fully utilized it provides the quickest and easiest way to track and access a child's immunization record.

Currently there are more than 1.6 million patients with over 11.6 million immunization records in the Central Registry. That number is growing as providers report each immunization administered to a child. When the registry with its' ancillary tools is fully utilized it provides an excellent method of getting patients' information on-line. This reduces the amount of time spent consulting with former providers for a patients' immunization history.

How can ASIIS benefit your practice?

1. You can retrieve a child's immunization record on-line and thus provide the necessary shots avoiding missed opportunities, which leave children susceptible to disease.
2. It provides a tool to generate Reminder/Recall notices to ensure that patients are immunized on time.
3. It provides an immunization forecast of doses based on a CDC approved schedule.
4. It provides an official printed record of a child's immunization to give to parents, schools, daycare or other authorized healthcare personnel in a matter of minutes.
5. The registry can accept data from most established billing systems and applications.
6. It has the potential to provide over 30 reports containing valuable statistics regarding patients and immunizations.
7. The registry serves as a receptacle for the collecting of immunization data as mandated under A.R.S. § 36-135.

What are your options for Reporting to ASIIS?

Providers who wish to report to the registry may do so by choosing either an electronic (PC-Immunize, PCI2000, PC - Immunize (PCIC), web application) or paper option.

Providers who desire to utilize the electronic method will be supplied with the necessary technical support and free software to make this possible.

Those sites, which prefer to report by paper may obtain the necessary forms and support by contacting the ASIIS User Support.

Free Training & Customer Support

The Arizona Department of Health Services is committed to maintaining the Arizona State Immunization Information System (ASIIS). As part of this commitment; we provide free training and support.

We also hold User Group Meetings to stay in tune with user's concerns and to inform users of changes in the immunization arena. We use this feedback to constantly update and upgrade tools in order to be more responsive to customer needs.
